

## RED Committee Charge:

Given the CMDA mission of educating, encouraging, and equipping Christian healthcare professionals to glorify God, the RED committee's purpose is to:

**A** - Guide the board and membership towards a biblical response both within the organization and the wider body of Christ as it pertains to issues of racism, equality and diversity especially as they intersect healthcare

**B** - Ensure that CMDA reflects the multi-cultural body of Christ both within leadership and membership by making recommendations to the board via the president on various issues that impact the demographics of the organization.

**C** - Address health and healthcare disparities, deficiencies or inadequacies that exist as a result of racial/cultural or socioeconomic bias

**D** - Be a resource for the board and CMDA members so they can lead in healing within this country in times of social and political unrest as it pertains to issues of racism, equality and diversity, as well as carrying a torch providentially to deal with issues still unaddressed.
